

Rondo Mist Sprayer

Rivulis Rondo Mist Sprayer Delivering a fine mist of 150 micron water droplets

Ideal for: Seed germination and cutting propagation

Rivulis Rondo Mist Sprayer

If you are growing from seeds, it is best to use a mist sprayer in order to protect seeds from large droplets of conventional micro sprinklers.

A mist sprayer differs from a micro sprinkler by spreading very fine drops that cannot be achieved with a conventional sprinkler with a spinner.

Each droplet is approximately 150 microns in size, which is distributed gently and evenly over the seeds / crop.

Product Information

Technical Data	
Operating pressure range	2.5 - 4.0 bar
Pressure (for flow rate calculation)	3.0 bar
Filtration requirements	
≤ 40 lph:	130 micron / 120 mesh
40 – 70 lph:	200 micron / 80 mesh
> 70 lph:	250 micron / 60 mesh

Use with

Use an anti leak mini valve to prevent drainage at shut off. The anti leak H model is used for pressures greater than 3.5 bar.

For insertion into PVC laterals, add a 4x7 mm grommet to the anti leak mini valve.
