Flows: 20 to 100 gpm (4543 to 22713 L/hr)

Pressures: 10 to 60 psi (0.69 to 4.14 bar) based on model

The PRU (Pressure Regulator Ultra) was designed to handle higher flows of 20 to 100 gpm (4543 - 22713 L/hr). Its 2-inch inlet and outlet size make it an ideal option for accurate zone and individual sprinkler pressure control. Its compact size fits in a valve box.

100% pressure tested, to ensure quality and performance

Very low hysteresis and friction loss

Large flow path resists plugging

Connections: 2" F NPT x 2" F NPT or 2" F BSPT x 2" F BSPT models available

Corrosion resistant
