

INSTRUCTIONS

INTRODUCTION

The AGRI RX was developed specifically for use with **AGRIPLAS GULF** transmitters.

INSTALLATION

Securely mount the unit to the **AGRIPLAS MOUNTING BRACKET**. Secure the bracket to the desired pole, pipe or wall. Ensure the antenna (mounted on the bracket is vertical, facing upwards).

Attach the hydraulic tubing as follows:

Solenoid base position 1 – Regulating Pilot (or leave open if no pilot used on valve)

Solenoid base position 2 – Auto port on Sagiv

Solenoid port – Up stream pressure

MAX DISTANCE FROM SOLENOID TO VALVE 100M AT A MAX HEIGHT DIFFERENCE OF 4M

WHEN RUNNING LONG DISTANCES, IF PILOTS ARE USED, SELECTOR T PIECES ADVISED.

Programming and connection of Receivers

Each Receiver is designed to have 4 outputs.

Receiver ID 01 = Output 1, 2, 3 and 4.

Receiver ID 02 = Output 5, 6, 7, and 8.

Receiver ID 03 = Output 9, 10, 11, and 1

Etc.
